**Precision Nutrition and Healthspan:
Perspectives, Innovations and the Future
September 9-10, 2025**

CH2M Hill Alumni Center
Oregon State University
Corvallis, Oregon, USA

Conference Prospectus

From the Director

Emily Ho, PhD
Director of the Linus Pauling Institute and
University Distinguished Professor of Nutrition,
Oregon State University

In 2023, the Linus Pauling Institute's Diet and Optimum Health Conference pioneered advances in Precision Nutrition and Healthspan Research. By bringing together leading experts in nutrition, immunity, the microbiome, and aging, and integrating cutting-edge data technologies, we established lasting collaborations that will shape the future.

In 2025, we are building on these breakthroughs to elevate our understanding of healthy aging and nutrition even further. **Precision Nutrition and Healthspan: Perspectives, Innovations and the Future** will focus on transforming today's discoveries in healthspan and precision health research into tomorrow's groundbreaking innovations.

As a sponsor of Diet and Optimum Health 2025, you'll have the unique opportunity to form strategic partnerships with some of the most influential minds in nutrition, wellness, and health data. Our exceptional program will cover preclinical, translational, and clinical research in aging and nutrition, while offering ample opportunities to network with key leaders across these fields.

I am excited to collaborate with our planning committee and session chairs to deliver compelling, forward-thinking content that will drive the next wave of innovation.

We hope you'll join us in Corvallis this September.

A handwritten signature in black ink that reads "Emily". The signature is stylized and written in a cursive-like font.
